Enformion Business Search

Know Who You're Doing Business With —Before You Do Business

Instantly uncover the business intelligence you need to validate companies, assess risk, and make informed decisions with confidence.

Every business relationship carries risk. Whether you're onboarding vendors, evaluating partners, extending credit, or investigating suspicious activity, incomplete information can lead to costly mistakes.

Enformion Business Search brings together business registration records, UCC filings, and new business filings into a single search experience, giving you a more complete picture of the organizations behind every opportunity.

Make Faster Decisions with Complete Business Intelligence

Gain the visibility you need to reduce risk, accelerate due diligence, and move forward with confidence.

Instead of searching multiple public databases and piecing together business records manually, Business Search delivers comprehensive business intelligence through a single solution that helps organizations:

- **Accelerate Due Diligence:** Access corporate filings, ownership information, and business registrations in one place to shorten investigation time.
- **Reduce Business Risk:** Identify potential issues such as outstanding UCC liens, newly formed entities, or questionable business relationships before they become liabilities.
- **Improve Investigation Efficiency:** Search by business name, affiliated individual, or address to uncover relationships and connections that may otherwise go unnoticed.
- **Increase Operational Productivity:** Eliminate manual research across fragmented sources and give analysts faster access to the information they need.
- **Support Better Business Decisions:** Validate vendors, partners, customers, and counterparties with reliable business intelligence that improves confidence at every stage of the relationship.

Enformion Business Search

Business Intelligence That Supports Every Investigation

From onboarding to investigations, uncover the business relationships that matter.

Vendor & Partner Due Diligence: Validate businesses, confirm registrations, and identify potential risks before entering new relationships.

Commercial Lending & Credit Reviews: Review UCC filings and existing secured interests to support more informed lending decisions.

Fraud & Risk Investigations: Identify affiliated businesses, ownership connections, and potential shell company activity.

Business Relationship Mapping: Reveal businesses associated with an individual to uncover hidden connections and conflicts of interest.

Address-Based Investigations: Discover every business registered at a location to identify shared addresses, virtual offices, or undisclosed related entities.

Move Forward with Confidence

Make reliable business intelligence the foundation of smarter business decisions.

Enformion Business Search helps your organization reduce uncertainty, accelerate investigations, and gain deeper visibility into the businesses you engage every day.
