

Enformion Product Sheet

Enformion Criminal Search

Uncover Criminal Records Faster. Make More Confident Decisions.

Instantly search nationwide criminal records through a single API to accelerate investigations, strengthen due diligence, and reduce operational complexity.

Organizations that rely on criminal history information often waste valuable time navigating fragmented public records across multiple jurisdictions. Searching county courts, state repositories, warrant databases, and sex offender registries individually creates delays, inconsistent results, and unnecessary manual effort.

Enformion Criminal Search streamlines the entire process by providing a single point of access to nationwide criminal records. Retrieve arrests, convictions, traffic offenses, warrants, and sex offender registry records quickly so your teams can make informed decisions with greater speed and confidence.

Turn Complex Criminal Searches into Faster, Smarter Decisions

Reduce manual research while improving visibility into the records that matter most.

Instead of piecing together information from dozens of disconnected sources, Criminal Search delivers comprehensive public-record intelligence through one streamlined solution, helping organizations improve efficiency while reducing investigative effort.

- **Accelerate Investigations:** Access nationwide criminal records from a single search instead of researching multiple jurisdictions individually.
- **Improve Decision Confidence:** Gain broader visibility into arrests, convictions, warrants, traffic offenses, and sex offender registry records to support more informed risk assessments.
- **Increase Operational Efficiency:** Replace manual record collection with an automated workflow that scales across high-volume screening and investigative processes.
- **Search Only What You Need:** Filter results by specific record categories to reduce noise and focus on the most relevant information.
- **Simplify Case Review:** Access mugshot images when available to provide additional context during investigations and manual reviews.

Enformion Criminal Search

Built for High-Confidence Decisions

Support screening, investigations, and due diligence with fast access to nationwide criminal records.

Tenant Screening: Evaluate prospective renters by identifying relevant criminal records before approving applications.

Fraud & Risk Investigations: Build stronger investigative case files by quickly gathering nationwide criminal history information.

Skip Tracing & Collections: Locate individuals with active warrants and support investigative efforts with broader identity intelligence.

Vendor & Partner Due Diligence: Screen business principals and key stakeholders to identify potential risks before entering new partnerships.

Corporate Security & Compliance: Strengthen internal investigations and security reviews with centralized access to criminal records.

Find the Information You Need—Without the Manual Work

Move investigations forward with comprehensive criminal intelligence from a single trusted source.

Whether you're supporting screening programs, conducting due diligence, or investigating potential fraud, Enformion Criminal Search helps your organization uncover critical criminal record information faster while simplifying complex public-record searches.
