

Enformion Product Sheet

Medicaid, SNAP, & TANF Eligibility Intelligence

Verify Eligibility with Greater Confidence

Accelerate benefit delivery while improving program integrity with trusted identity intelligence.

Public assistance agencies are under constant pressure to deliver benefits quickly while ensuring every eligibility decision is accurate. Incomplete, outdated, or inconsistent data can lead to improper payments, manual reviews, and unnecessary administrative costs.

Enformion Medicaid, SNAP, and TANF Eligibility Intelligence helps agencies validate applicant information, verify eligibility, and continuously monitor beneficiary records using trusted identity intelligence. The result is faster determinations, improved accuracy, and stronger program oversight.

Improve Accuracy. Reduce Risk. Deliver Benefits Faster.

Make confident eligibility decisions with current, trusted intelligence.

Accurate eligibility starts with accurate information. Enformion provides agencies with comprehensive identity and household intelligence that helps eliminate uncertainty throughout the eligibility lifecycle.

- **Accelerate Eligibility Determinations:** Verify applicant information quickly to reduce processing delays and improve speed-to-benefit.
- **Reduce Improper Payments:** Identify inaccurate or outdated records before benefits are issued, helping minimize fraud, waste, and administrative errors.
- **Improve Program Integrity:** Continuously monitor beneficiary information to detect changes that may affect eligibility.
- **Increase Operational Efficiency:** Replace time-consuming manual verification processes with automated identity and data validation.
- **Strengthen Decision Confidence:** Access comprehensive identity and household intelligence backed by decades of trusted data expertise.

Medicaid, SNAP & TANF Eligibility Intelligence

A Smarter Approach to Eligibility Verification

Validate identity, household, and property information with a single trusted source.

Enformion brings together trusted identity intelligence to help agencies validate applicant information throughout the enrollment lifecycle.

Identity Verification: Confirm identities using verified names, addresses, phone numbers, email addresses, and additional consumer identity attributes.

Real-Time PII Validation: Verify personally identifiable information against trusted identity intelligence to improve eligibility accuracy.

Household Composition Verification: Validate household size, residency, and address relationships to support benefit qualification.

Continuous Eligibility Monitoring: Receive alerts when key identity attributes change such as address, phone number, email, or property ownership.

Vehicle Intelligence: Access vehicle ownership, VIN, title, registration, and plate information when applicable to eligibility reviews.

Property Intelligence: Review ownership history, assessed value, tax records, and property characteristics to support verification efforts.

Medicaid, SNAP & TANF Eligibility Intelligence

Built for Modern Public Assistance Programs

Make Every Eligibility Decision Count.

Medicaid Eligibility Verification: Validate applicant identities and monitor changes that could impact continued eligibility.

SNAP Enrollment & Redetermination: Verify household composition and residency while reducing manual review efforts.

TANF Eligibility Reviews: Improve application accuracy with comprehensive identity and household validation.

Program Integrity & Compliance: Detect discrepancies that may indicate ineligible benefits or outdated beneficiary records.

Ongoing Case Management: Continuously monitor beneficiary records to identify changes requiring follow-up or reassessment.

Deliver Benefits Faster. Protect Program Integrity.

Trusted identity intelligence for more confident eligibility decisions.

When agencies have confidence in their data, they can deliver benefits more efficiently, reduce administrative burden, and strengthen public trust. Enformion provides the identity intelligence needed to verify eligibility with greater speed, accuracy, and confidence.
