

Enformion Product Sheet

Enformion Verification for Benefits Eligibility

Verify Eligibility with Confidence. Deliver Benefits with Integrity.

Accelerate eligibility decisions, reduce improper payments, and gain a more complete view of every applicant.

Determining eligibility for public assistance programs requires more than self-reported information. Incomplete, outdated, or inaccurate data can delay benefits, increase administrative costs, and expose agencies to fraud and improper payments.

Enformion Verification for Benefits Eligibility connects trusted data from thousands of sources, empowering organizations to streamline eligibility workflows while improving program integrity and ensuring benefits reach the people who truly qualify.

Strengthen Every Eligibility Decision

Verify more. Investigate less. Deliver benefits faster.

Eligibility verification should empower caseworkers, not slow them down. Enformion delivers the trusted intelligence needed to automate verification, reduce manual research, and support accurate benefit determinations.

- **Accelerate Eligibility Reviews:** Quickly validate applicant information with comprehensive identity, property, and household insights that reduce time spent gathering supporting documentation.
- **Reduce Improper Payments:** Identify discrepancies and uncover hidden ownership or household relationships that may impact eligibility before benefits are issued.
- **Improve Program Integrity:** Strengthen verification processes with independently sourced intelligence that provides greater confidence than self-attested information alone.
- **Increase Operational Efficiency:** Replace time-consuming manual investigations with fast, automated access to the data needed to make informed eligibility decisions.
- **Support Better Experiences:** Deliver faster determinations and minimize unnecessary delays for qualified applicants.

Enformion Verification for Benefits Eligibility

See the Complete Picture Behind Every Application

Support consistent, defensible eligibility decisions while improving operational efficiency.

Enformion combines identity intelligence with property, vehicle, and household data to create a more complete view of each applicant, helping agencies verify eligibility while reducing administrative burden.

- Comprehensive identity verification
- 40+ years of address history
- Real property ownership and assessor information
- Vehicle ownership and registration data
- Household composition and address verification
- Associated individuals and relationship insights
- Flexible delivery through APIs or batch processing to integrate into existing workflows

Built for High-Impact Eligibility Workflows

Support every stage of the benefits verification process with trusted identity intelligence.

- **Initial Benefits Eligibility:** Verify applicant identity, residency, household composition, and ownership information before approving benefits.
- **Program Integrity Reviews:** Detect inconsistencies that may indicate ineligible applicants or improper payments.
- **Recertification & Renewals:** Validate continued eligibility with updated identity and household information.
- **Caseworker Investigations:** Access comprehensive data to resolve discrepancies faster and reduce manual research.
- **Fraud Prevention:** Strengthen verification beyond self-attestation to help identify potential misuse of public assistance programs.

Make Every Eligibility Decision Count

Streamline verification, reduce risk, and improve outcomes.

Equip your agency with the trusted identity intelligence needed to verify applicants faster, strengthen program integrity, and confidently deliver benefits to those who qualify.
